**NOTICE OF PUBLIC HEARING FOR CONDITIONAL USE PERMIT UNDER PROVISIONS  
OF CHAPTER §385-10(B)(7) AND §385-21 OF THE ZONING CODE OF THE  
CITY OF WATERLOO, JEFFERSON COUNTY, WISCONSIN**

Please take notice that the Plan Commission of the City of Waterloo, Jefferson County, Wisconsin, acting under provisions of Chapter §385-10(B)(7) and §385-21 of the Zoning Code of the City of Waterloo, shall hold a public hearing on the matter of an application for a conditional use permit received from Eugene and Nancy Cook, owners of the property located at 1042 E. Madison Street, Waterloo.

The applicant is requesting a conditional use permit to allow the construction of an additional 12' X 20' (240 square feet) accessory building. The applicant currently has an attached garage. A conditional use permit is required for an additional garage or accessory building exceeding 144 square feet in a residential district.

The property is described as follows:  
Tax Parcel: #290-0813-0812-001  
Legal Description: Out Lot 32, ASR PLT  
Jefferson County, Wisconsin  
Street Address: 1042 E. Madison Street

Be further notified that the Plan Commission will hear all persons interested or their agents or attorneys concerning this conditional use permit application at a public hearing. The public hearing will be held at 7:00 p.m. on Tuesday, February 25, 2014 in the Council Chamber of the Municipal Building, 136 N. Monroe Street, Waterloo.

Subsequent to the public hearing, the Plan Commission shall recommend approval, denial, or conditional approval of the conditional use permit to the Common Council. The City Council will act on the Plan Commission's recommendation at its regularly scheduled meeting on Thursday, March 6, 2014.

## NW 1/4 NE 1/4 OF 8-8

STATE OF WISCONSIN DEPARTMENT OF NATURAL RESOURCES  
PUBLIC NOTICE OF INTENT TO REISSUE A WISCONSIN POLLUTANT DISCHARGE ELIMINATION  
SYSTEM (WPDES) PERMIT No. WI-0030881-08-0

Permittee: City of Waterloo, 575 Commercial Avenue, Waterloo, WI 53594

Facility Where Discharge Occurs: Waterloo Wastewater Treatment Facility, 401 Hendricks Street, Waterloo, Wisconsin

Receiving Water and Location: Mauneshia River (Mauneshia River Watershed, UR05 – Upper Rock River Basin) in Jefferson County; NEQ, SWQ, Section 5, T8N, R13E

Brief Facility Description and Summary of Proposed Changes: The wastewater treatment facility accepts wastes from both the City of Waterloo and the Portland Sanitary District. The current population served is estimated at 3500. There are several industrial as well as commercial contributors to the treatment facility. The design capacity of the plant is 0.458 MGD, but average flows are 0.47 MGD. The facility is an activated sludge/extended aeration plant. It has two final clarifiers and two tertiary sand filters. The facility uses UV for disinfection and aerobic sludge digestion. Phosphorus is treated chemically using alum. The facility has been found to be in substantial compliance with their current permit.

The limits for BOD, pH, DO, & Fecal Coliform have been retained in their permit reissuance with no change. The Waterloo WWTP is in the Rock River TMDL, which was approved September 28, 2011. Weekly average and monthly average total suspended solids (TSS) mass limits as well as monthly average phosphorus mass limits were calculated to comply with the TMDL. Waterloo can easily meet the TSS mass limits, and are effective on date of issuance. Weekly average TSS mass limits for May through October from the previous permit will remain. The phosphorus limit of 1.0 mg/L is retained as an interim limit and reporting the pounds of phosphorus discharged has been added. New daily maximum, weekly average and monthly average Ammonia limits have been included based on new water quality standards which came into effect in 2004. Waterloo has requested a continuation of their Chloride variance and an interim limit of 900 mg/L is included. Reporting of pounds of chloride discharged is also included. Acute and chronic WET tests are required every other year. Temperature monitoring during the fourth year of the permit has been added. Chlorine weekly average and daily maximum limits have been removed. Additional outfall for sludge (005 – cake sludge) has been added.

Permit Drafter: Amy Garbe, DNR, SCR Headquarters, 3911 Fish Hatchery Road, Fitchburg, WI 53711, (608) 275-3258, Amy.Garbe@wisconsin.gov

Basin Engineer: Song Tran, DNR, 2300 N Dr. Martin Luther King Jr. Dr., Milwaukee, WI 53212, (414) 263-8674, Song.Tran@Wisconsin.gov

The Department has tentatively decided that the above specified WPDES permit should be reissued.

Limitations and conditions which the Department believes adequately protect the receiving water are included in the proposed permit. Land application of waste shall be done in accordance with permit conditions and applicable codes. All land application sites shall be approved prior to their use. To receive a list of approved sites, or to be notified of potential approvals, contact the basin engineer.

Chloride Variance: The Department has determined that a water quality-based effluent limitation (WQBEL) for chloride is needed in this permit to protect aquatic life. As allowed under s. NR 106.83(2), Wis. Adm. Code, the permittee has requested a variance to the chloride WQBEL. In support of this request, the permittee has submitted documentation intended to demonstrate that the cost of complying with the WQBEL through the use of end-of-pipe wastewater treatment may cause substantial and widespread adverse social and economic impacts in the area where the discharger is located. The Department concurs with that assessment, however this concurrence is subject to USEPA approval. In an effort to achieve chloride effluent reductions that are practically and economically achievable within the term of the proposed permit, the Department and the permittee have mutually agreed upon specific permit terms that include an interim limitation, a target limit (or value, as the case may be), and certain source reduction activities. As allowed under s. NR 106.83(3), Wis. Adm. Code, these requirements are contained in the proposed permit.

Persons wishing to comment on or object to the proposed permit action, or to request a public hearing, may write to the Department of Natural Resources at the permit drafter's address. All comments or suggestions received no later than 30 days after the publication date of this public notice will be considered along with other information on file in making a final decision regarding the permit. Anyone providing comments in response to this public notice will receive a notification of the Department's final decision when the permit is issued. Where designated as a reviewable surface water discharge permit, the U.S. Environmental Protection Agency is allowed up to 90 days to

submit comments or objections regarding this permit determination. If no comments are received on the proposed permit from anyone, including U.S. EPA, the permit will be issued as proposed.

The Department may schedule a public informational hearing if requested by any person and shall schedule a public informational hearing if a petition requesting a hearing is received from 5 or more persons or if response to this notice indicates significant public interest pursuant to s. 283.49, Stats. Requests for a public informational hearing shall state the following: the name and address of the person(s) requesting the hearing; the interest in the proposed permit of the person(s) requesting the hearing; the reasons for the request; and the issues proposed to be considered at the hearing.

Information on file for this permit action, including the draft permit, fact sheet (if required), and permit application, may be inspected and copied at the permit drafter's or basin engineer's office, Monday through Friday (except holidays), between 9:00 a.m. and 3:30 p.m. Please call the permit drafter or basin engineer for directions to their office location, if necessary. Information on this permit action may also be obtained by calling the permit drafter at (608) 275-3258 or by writing to the Department. Reasonable costs (usually 20 cents per page) will be charged for copies of information in the file other than the public notice and fact sheet. Permit information is also available on the internet at: <http://dnr.wi.gov/topic/wastewater/PublicNotices.html>. Pursuant to the Americans with Disabilities Act, reasonable accommodation, including the provision of informational material in an alternative format, will be made to qualified individuals upon request.

Thursday January 2<sup>nd</sup>, 2014

On Monday December 9<sup>th</sup>, 2013 we had our monthly EMS training. We had three different stations the first one was CCR (cardio-cerebral resuscitation), this is for when a patient would go into cardiac arrest when we are there. The body has enough oxygen is the system where all we need to do is chest compressions. With this we need to have a good rhythm and good compressions to have a better chance. The second station was quarterly evaluations; we set up 6 different stations to check on our members skills. There is airway management, IV & IO administration, all of our medications we use they have to tell us why we use them and when, vital signs which include blood pressure-respirations-lung sounds-pulses, blood sugar testing, 12-lead placements – with this they have to place the electrodes properly to get a good picture of the heart to send it to the ER. The third station was lifting properly, with having the rangers set up with rescue beds we needed to train on how to life the patient up and into the bed. The rescue beds on the rangers are taller than normal do to the tracks. We practice safety due to most of the time when we use these machines it is in bad weather. Safety always comes first.

On Monday December 16<sup>th</sup>, 2013 we had our monthly Fire training. Our training was actually an actual emergency. Around 5:30 pm we were called out to a pretty bad vehicle crash during bad weather. Once we returned from the emergency call we went through all of the apparatus to check equipment to make sure we are not missing anything and to make sure that it all works properly and to clean up after the call.

Sincerely,

Chief Vern Butzine
