WATERLOO FIRE & RESCUE  
900 INDUSTRIAL LANE  
WATERLOO, WISCONSIN 53594

Friday August 1<sup>st</sup>, 2014

On Monday July 14<sup>th</sup>, 2014 we had our monthly EMS training. The training was a scenario and training on a med sled. The scenario was a CCR (cardio cerebral resuscitation) situation, which is a pulseless non breathing patient that is witnessed. We are able to do compressions without the breathing until we get an advanced airway in. The other part of this scenario is placing an IV in properly and getting the advanced airway in place. Training with the med sled is a review which is not used often. The med sled is used for confined spaces and needs to be properly hooked up to use adequately so not to harm the patient.

On Monday July 21<sup>st</sup>, 2014 we had our monthly Fire training. The training had two stations. The first station was on hose advancements. Two crews have to grab the appropriate hose and advance the hose to the structure, fan the hose out and then, when charged, they have to advance it through the structure and knock the fire out. This station is timed and the goal is when the apparatus stops they have to have the fire knocked down within 2 minutes. The second station is the importance of the first in crew reporting. On any fire the first in crew needs to remember what they see and do while in the structure. The purpose of this training is when we perform our investigation we know how items were set up and entry ways were prior to our extinguishment.

Sincerely,

Chief Vern Butzine
